Mr. Charles A. Hansen, Assistant Manager for
Waste Disposition Project
US Department of Energy
Savannah River Site Operations Office

RE: Governor's Nuclear Advisory Committee Comments
on Accelerated Cleanup Program

Dear Mr. Hansen:

The South Carolina Governor's Nuclear Advisory Council, through its DOE-SRC Committee, has been in active dialog with DOE at SRS on the Accelerated Cleanup Program for about two years. The Council appreciates the excellent working relationship it has had with DOE and WSRS Staff over the last two years. The attached update presents the Council's current view on the excellent progress on this important effort. The NAC looks forward to continuing our joint effort in the months ahead.

Sincerely,

Ben Rusche, Chairman
